from your nearest "Sales and Display Garden." These movel gardens operated by Cole Nursery Sales.

Inc., bring to your neighborhood for inspection, and sule, "Everything That's Good and Hardy." The stack is replenished fresh daily, from Cole's 700 acres in Painesville, Plants, handled properly

and delivered to you full of their original life and vitality by trained, courteous nurserymen.

EVERGREEN BITTERSWEET

(Euonymus) (Lovely plants that you, too, will love) Spreading or upright plants with thick, glossy evergreen leaves. Flowers are insignificant, being of a greenish white color, but are followed by truly beautiful orange-red fruit. Most varieties can be used for formal or informal (depending on shearing) edging or dwarf hedge, specimens or vines. Thrives in sun or shade. WINTERCREEPER (E. cadicans)

Dense growing trailing vine; can be trimmed to form a low border or hedge, clings to stone or wood. Leaves are dainty and abundant, dark green with white veins.

3-yr., 18 to 21 in. (75c) 50c each

3-yr., 18 to 21 in. (75c) 50e each BIGLEAF WINTERCREEPER (E. radicans

Evergreen shrub or vine with thick, fleshy stems and leaves and an abundance of red fruit with yellow pods, very attractive. We consider this one of the finest plants in existence. We carry a stock of 50,000 plants to take care of the mammoth demand. 3-yr., 12 to 18 in. (80c) 50c each

RHODODENDRONS Rhododendrons are the most hundsome of all broadleaved evergreen plants; folinge is large and leathery; immense, broad panicles of flowers are produced in early Summer. The location and preparation of the Rhododendron bed is most aportant. Select a partially shaded location and preferably one where the plants will be protected from severe winds by buildings, evergreens, or other shrubbery; plant in at least eighteen inches of German Peat and keep mulched both Summer

and Winter with peat, grass clippings, leaves, or

well rotted manure. We dig all Bhododendron

with ball of dirt to insure successful planting

Buy from Nurserymen Employing Trained Men

Because

Exposure of plants to drying air, or warm store-room for a short time often

injures or kills such plants.

An Evergreen, especially, if roots arrived will set its resinous sap never to flow again. Often the plant will not show its injured or dead condition for some time. Properly Trained Nurserymen realize the necessity of Proper Care for plants at every minute from digging to planting. Properly Trained Nurserymen can give you much valuable information that will

usure success with your plants. Properly Troined Nurserymen can give you the right plants for the right place and CATAWBA RHODODENDRON (R. calmo-Compact growing bush with broad, roundish

FRESH PLANTS

leaves, flowers lovender-pink; free flowering. early June. 18 to 21 in. (\$1 50) 83.90 each ROSEBAY RHODODENDRON (R. maximum)

The largest of all notive Rhodudendrons, with very large, heavy foliage and waxy white flowers in July (\$3 00) \$2.25 each 18 to 21 in.

In locations that get little sun try some Evergreen Shrubs- they thrive in the shade.

ROCK COTONEASTER (C. horizontalis)- 3 ft. Dwarf shrub with horizontal or trailing branch-, heavily set with glorious wavy foliage, in Winter is covered with brilliant red berries and

12 in., from 6-in. pots (\$1.50) ... 95c cach GARLAND FLOWER (Daphne encorum) A most beautiful dwarf shrub abundantly cov-

ered with deliciously fragrant pink flowers in April and May and handsome waxy foliage. Only pot grown plunts are sure of successful transplanting, transplanting, to 10 in. spread, from 5 in. pols (\$2.00) __.95c each

GROUND COVER PLANTS

RECEIVED

Cole's Hardy Terennials and Rockery Plants (New Low Prices with a New Guarantee)

An innovation in Nursery Circles. It has been generally considered that Perennials carry a high mortality rate—often as high as 50% when purchased from some heated storerooms. To dispel this fear-we offer To Guarantee Every Percunial purchased from us during the Spring and Summer of 1932 to live and thrive. All we require is that you report any loss together with your receipt before September 1, 1932. Losses will be immediately replaced with additional plants.

Cole Has Faith in Plants of Known Value. No true flower lover will hardly be content without some of the old-fashioned Perennials to adorn the garden or to cut and bring into the house where they may be enjoyed by the whole family.

The hardy perennial garden is continuing to increase in popularity, as there is practically no period from April until November, when it does not furnish bloom of some kind, not only for one season but year after year with proper attention.

Hardy Perennials have a wide variety of uses—in beds, borders, as a foreground planting for shrubber, plantings, in rockeries, and in the formal and informal gardens.

Following the variety names, we have given the approximate height, under average conditions, of

the plant and maturity. Varieties marked with an asterisk (*) are especially suitable for the rockery garden.

Cole's Perennials will provide a Superb Book Gordan producing a gorgeous continuous color display

DELPHINIUM (Larkspur)

One of the best perennials for cutting and mass planting, should be in every garden. June to Sentember.
